## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent

No. 6,747,301 issue to Hiner et al.

- Regarding claim 1, figures 6, 7 and 8 of Hiner show a magnetoresistive memory device (300) comprising an array of magnetoresistive memory elements (303) and at least one magnetic field sensor element (424), wherein the magnetoresistive memory device comprises a non-homogeneous shielding means (422, 426) so as to shield the array of magnetoresistive memory elements differently from an external magnetic field than the at least one magnetic field sensor element a shielding difference of at least 5%. See column 8, lines 1-50 and claim 1.

### ***Allowable Subject Matter***

2. Claims 7-9 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for allowance is the inclusion of a second shielding means which has different reduction ratio in order to create different magnetic field in measuring an external magnetic field.

Art Unit: 2824

4. Claims 2-6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tuttle et al (6,999,339) and Deak (7,230,844) are cited as of interest.
